Concrete Designers/Engineers
(alphabetical by company)
Designs created as of January 16, 2019

Plans for new or substantially altered mix/load pads and containment structures at a bulk agrichemical storage facility must be professionally designed. A facility operator is not required to choose from the list provided. The design contractors listed below are shown because they have designed structures for agrichemical containment that meet the requirements of Wis. Admin Code ch. ATPCP 33 – Fertilizer and Pesticide Bulk Storage and *Wisconsin Minimum Design and Construction Standards for Concrete Mixing and Loading Pads and Secondary Containment Structures* or because they have expressed interest in providing this service to the agronomy industry. This list in no way constitutes approval or recommendation of any of the contractors listed.

Todd Gorter
