PEDv IS POTENTIALLY DEVASTATING TO YOUR BUSINESS AND THE PORK INDUSTRY.

States across the country are taking preventive steps to protect the pork industry from Porcine Epidemic Diarrhea virus (PEDv). The disease continues to shrink herds and could mean higher prices at the grocery store.

having visitors wear disposable plastic booties, washing hog trucks to knock off any of the virus, and inspecting new pigs carefully before they are brought inside.

Possible impacts of PEDv are:

- Loss of 3.5 to 4 million pigs nationwide
- 2 to 3 percent increase in pork prices

You play an important role in controlling the spread of Porcine

Epidemic Diarrhea. Though vaccines are now available, they have not been proven in the marketplace so pork industry officials are counting on biosecurity to keep the virus out of herds nationwide. This means

Study and implement the biosecurity measures issued by the pork industry to ensure you are safeguarding your business, reputation and the pork population in Wisconsin.
