

SnapPlus Version 3

Release planned for 2024

Addresses common issues for nutrient management planning

Web-based program with log-ins

- No need to install or update
- Planner will designate who can have edit or view-only access
- No more lost data
- Field maps integrated into planning screens (no more upload and download!)

Designed for flexibility

- Screens that can display more or less information as needed
- Rotations are built crop-by-crop instead of year-by-year; planners no longer limited to premade double crops

Try the pilot version at <https://production.snappplus.wisc.edu/> or by scanning the QR code below. (Live after Sept. 1, 2023. Laptop or desktop computer recommended, log-in required)
