

## Public Notice: Submit Comments by December 30 for Stinger® Strawberry Herbicide

**Release Date: December 19, 2019**

**Contact: Leann Duwe, Public Information Officer  
(608) 224-5130, [leannm.duwe@wi.gov](mailto:leannm.duwe@wi.gov)**

MADISON – The Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) is accepting comments through December 30 for a proposed special pesticide registration to allow strawberry growers to use Stinger® herbicide for weed control. The special registration helps strawberry growers control broadleaf weeds, such as dandelion, Canada thistle, bull thistle, and perennial clovers. No other herbicides are registered for use pre-harvest in strawberries to control these weeds.

The current registration for Stinger® will expire December 31, for use on strawberries pre- and post-harvest. Its use on strawberries has been allowed previously under three successive five-year permits. No reports of adverse effects were received during previous registrations. The proposed registration will go through December 31, 2024. Dow AgroSciences LLC is the manufacturer, and the active ingredient is clopyralid.

The preliminary environmental assessment indicates that the proposed registration will not require a full environmental assessment. For a copy of the assessment, contact:

Alyssa Foss, DATCP  
P.O. Box 8911  
Madison, WI, 53708-8911  
(608) 224-4547

The assessment is also available for review at:

DATCP  
2811 Agriculture Dr.  
Madison, WI 53708  
Monday-Friday, 7:45 a.m.-4:30 p.m.

Comments received on or before 4:30 p.m. on Monday, December 30, will become part of the preliminary environmental assessment record.

### How to Submit Comments

Submit comments to Alyssa Foss by mail at the above postal address or email at [alyssa.foss@wisconsin.gov](mailto:alyssa.foss@wisconsin.gov).

### More Information

The special registration process allows states to register additional uses of pesticide products other than those listed on their labels, without prior federal approval. It helps growers address local pest problems that cannot be adequately controlled by any available federally registered product. These problems include insect outbreaks, fungal diseases, and grasses and weeds that outcompete crops. For more information visit [https://datcp.wi.gov/Pages/Programs\\_Services/SpecialPesticideRegistrations.aspx](https://datcp.wi.gov/Pages/Programs_Services/SpecialPesticideRegistrations.aspx).
