APPENDIX B: APPRAISAL AND COMPENSATION PROCESS

The acquisition of land by entities including but not limited to departments, municipalities, boards, commissions, public officers, and business with eminent domain authority in Wisconsin, is stipulated under [Wis. Stat. §32.06](#). If the entity (the condemnor) actualizes their powers of eminent domain by exercising condemnation, the condemnor shall first provide an appraisal of the affected property to each landowner prior to the start of land acquisition negotiations. An appraisal is an estimate of fair market value, additional information about the appraisal process and landowners rights can be found in the Wisconsin Department of Administration publication, "[The Rights of Landowners under Wisconsin Eminent Domain Law](#)," also listed in Appendix D.

The condemnor may conduct a market study to determine current area property values of affected property. If the landowner signs an appraisal waiver form, the market study will be the basis for the condemnor's offer of compensation and no individual property appraisal will be conducted. The condemnor may also offer additional compensation to landowners who choose to sign the appraisal waiver form.

Landowners have the right to obtain their own appraisal of their property under Wisconsin's eminent domain law ([Wis. Stat. §32.06](#)) and will be compensated for the cost of this appraisal if the following conditions are met:

- 1) The appraisal must be submitted to the condemnor or its designated real estate contractor within 60 days after the landowner receives the initial appraisal
- 2) The appraisal fee must be reasonable
- 3) The appraisal must be a full, narrative appraisal
- 4) The appraisal must be completed by a qualified appraiser

Through the process of condemnation, a jurisdictional offer made to the landowner in accordance with [Wis. Stat. §32.06\(3\)](#) will include an appraisal of the fair market value for the land acquisition or easement and any anticipated damages to the property. The fair market value means the price that a willing buyer would pay to a willing seller in the market. This will be based on at least one full narrative appraisal for each property the condemnor intends to acquire. The appraisal must be presented to the landowner. The amount of compensation is based on the appraisal(s) and is established during the negotiation process between condemnor and the individual landowners.

The condemnor is required to provide landowners with information about their rights in this process before negotiations begin. [Wis. Stat. § 32.035\(4\)\(d\)](#) additionally stipulates that if the condemnor actualizes their condemnation authority, the condemnor cannot negotiate with a landowner or make a jurisdictional offer until 30 days after the AIS is published.

APPENDIX C: AGRICULTURAL LANDOWNER COMMENTS

See attachment on next page

**Paul and Lori Abel
4877 COUNTY RD N
ARPIN, WI 54410**

Section B: Agricultural Operation Details

8. Complete the tables below, describing your entire farm operation. Please include all agricultural land you own or manage, including land rented from others.

Land Cover	Acres
Cropland	38
Pasture	16
Managed Woodlands	17.6
Idle or Fallow Farmland	
Homes and Farm Buildings	10
Wetlands	
Other ()	
Total	81.6

Agricultural or Conservation Programs	Acres Enrolled
Farmland Preservation (FP) Program Zoning	
FP Agreement Agreement # _____	
FP Zoning & Agreement Agreement # _____	
Conservation Reserve Enhancement Program (CREP)	
Conservation Reserve Program (CRP)	
Managed Forest Land (MFL)	
Other ()	

Livestock	Number
Dairy Cows	
Replacement Dairy Cattle	
Beef Cattle	
Pigs	
Sheep / Goats	50
Poultry	
Other ()	

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?

(Check all that apply)

- ☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☐ Homes or Farm Buildings
☐ Managed Woodlands ☐ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles	<input checked="" type="checkbox"/>	
Erosion control	<input type="checkbox"/>	
Grassed waterways	<input type="checkbox"/>	
Fencing	<input checked="" type="checkbox"/>	
Irrigation	<input type="checkbox"/>	
Residence	<input checked="" type="checkbox"/>	
Farm Buildings	<input checked="" type="checkbox"/>	
Access	<input type="checkbox"/>	
Parcel severance	<input type="checkbox"/>	
Lumber	<input type="checkbox"/>	
Firewood	<input type="checkbox"/>	
Organic certification	<input type="checkbox"/>	
Aerial spraying / seeding	<input type="checkbox"/>	
Manure/fertilizer application and/or storage	<input type="checkbox"/>	
Other ():	<input type="checkbox"/>	

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

Decrease in farm value

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

drain tile along Agin-Sherry Rd.

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

all very good

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

fences - along Apple-Sherry Rd. builded 2010
new addition on the house 2016
new shed or shop 2012.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

none

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

very good.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Lost of Farm Land do to
poles, & soil compaction

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☒ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

1. Farm Value
We're thinking about retiring from raising market lambs and selling our farm but already some of the younger couples that ~~were~~^{were} interested are backing out ~~about~~ hearing about the Grid Forward.

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

The line cuts the field in half. Access to the eastern portion has no other access.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

Drainage ditch to the south must be open to allow water to flow

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Highly Productive Farm land = to or better than the rest of the farm

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Timing matters. if construction happens during summer growing season, crop would be destroyed. Access to planting, spraying, fertilizing, harvesting all negatively impacted.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☐ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

No positives - All negative For the farm.
~~Long~~ Long term compaction of the soil is big concern

Thank you.

Additional Responses from questionnaire.

4. Farmland rented from others, along proposed project area contact info

[REDACTED]

11. The proposed project would greatly affect our current and future dairy operation as a whole in many ways. The first is the close proximity of the new substation and proposed lines, currently the lines run at an angle into the existing substation and are located away from our home, machine shed, and barn. With the new lines they are wanting to move them within 300 feet of our current dairy barn, and almost right over top of potential future building projects. It is nearly impossible to even consider new, less labor intensive facilities, when ATC will not allow us to see plans of what/ why they want to build so close. Our dairy operation will be unable to progress until we know how the new lines and substation will affect it, with stray voltage, loss of land for feed, and manure application.

12. Throughout our farm we have worked over the years to improve drainage and soil conservation with drain tile, grassed waterways, and no till practices. This project would go through or along a large percentage of our fields, and potentially damage work that we have done. The first is by the planned substation on parcels 2000318 and 2000319, the entire hill currently drains right through the area they want to build on. This will cause the water to sit in the fields or find a different way to flow, causing potential wash outs. The next area is to the west where they want to move the new poles approximately 70ft north, in parcel 2000341. We currently have two grass waterways, and two drain tiles that flow into the grass waterways. The heavy machinery would cause compaction and possibly crush the tile lines, causing other parts of the field to become saturated. The next area it would affect is parcel 2000347, which is one of our rented fields, it currently has tile lines going to the road ditch where it could be affected by construction. From there the next fields it would affect are on parcel 2000350, here we are planning to add tile lines to help with drainage of a couple springs. We also cleaned the road ditch out two years ago and reseeded it to help drain the field and also reduce potential runoff/ erosion.

13. Currently we use all buildings on our dairy operations, with the intention of adding additional buildings. All buildings are well maintained, and we plan to use them as long as we are able to. The proposed project would have lines running very close to our operation as we noted in the response to question number 11. This could cause stray voltage and cost us an unknown large amount of money, or even possibly being unable to use the buildings for their intended purposes anymore.

14. We currently have an existing 5 strand barbed wire livestock fence along the east side of the proposed project area. With being unable to see the exact plans we are not sure how close the project would get to it, or if ATC would take it down. Either way it is currently in working condition, and being used for our dairy cattle pasture.

16. The land that could be acquired for this project is above average for productivity compared to the rest of our cropland. It is the land that has been owned by our family for the longest, and is nearly all of the cropland that came with the home farm. It is a mix of Fenwood Silt Loam, Eauplaine Silt Loam, and Milladore Silt Loam.

17. The soil, crops, and productivity of our land affected by the project would be impacted in a few different ways. The first is compaction from heavy construction equipment. It will take years to get rid of the compaction caused by this project, and extra time and money on our part to get the soil back to its original state. The next potential impact is future use of the area where ATC wants to move the poles 70ft north into our field. With equipment getting larger it is harder to maneuver around obstacles, this could cause problems with potential damage to poles, and our equipment. With the custom operators we use to apply spray and fertilizers to our crops, a concern they have is they have booms that are 90 to 120ft, and they would not be able to go around the poles as they are 70 ft from the road ditch. This would cause us to have reduced yields, and potential weed problems in our fields. Another potential problem is if we have established alfalfa fields along the project, if damage is done to the alfalfa plant it would cause us to have an area of unproductive land until we rotate the crop to corn, as alfalfa is unable to be reseeded due to its autotoxicity.

19. Additional Info.

The land also is our closest land for manure application and harvesting, they seem to think they want the land right next to, and close to their existing substation. They do not take into consideration how losing that land for us would be. We offered to sell them the pasture land to the east of the current plans, however they said it would not work, and now are trying to take every single acre of clear crop land, other than one acre right behind our house. They say it is easier to buy the entire section of land, yet they won't touch the current fenced in pasture land, they are only after the clear land we feel as it is easier for them to build on, and they know they can enforce eminent domain to get it.

For future building projects we would like to build them to the north, however with the easement ATC wants we would be unable to build, unless they would move the lines to the north instead of having them come straight out to the south for one or two spans. Currently the lines run at an angle, eliminating the need for extra poles and keeping them away from our home and buildings. The lines run with each other for the entire rest of the project, until they get here, there should be a way they can make it work to keep them together going into the substation. Or possibly running the lines a half mile north, on Arpin-Sherry Road, to the current double pole 345v line, those could be changed over to the monopole design they are intending to use for this project. This easement is already 150 feet wide and would lead right into the substation, and it would eliminate the need for poles 70 feet into our field.

In addition to other effects the project would cut our access off for parcel 2000322A. The current trail runs north from our machine shed towards the substation, it then follows the eastern side of the substation until it reaches the end of our parcel. From there we are able to use the neighbors trail, which was part of the agreement when we purchased parcel 2000322A from them. This proposed project would cause us to have to travel approximately 3.2 miles around on the road to gain access to our field, causing more wear on equipment, and also consuming more of our time.

Also based on what plans we have found on the PSC website, we feel that ATC is not effectively trying to minimize the acreage needed for this potential substation. They are wanting to add another driveway in addition to the large one they currently use. In the plans it looks like they will have access to the new substation right through the existing substation with two

different areas one to the north and another just to the north of "Wet pond 2". They also would like to have two ponds on our cropland, one of which would drain into our neighbors field. We are unsure what these ponds are needed for, or why they couldn't be built in our pasture area to the east, instead of on our crop land. In the plans it also mentions that they will be demolishing the current 345kV ring bus, what will be put in this place, or will it just be sitting as idle space. They also are not utilizing all the current crop land on the northernmost part of our crop land per their plans. If it was all shifted north it would keep our field a square, instead of all irregular edges. If all these ideas were taken into consideration it would lessen the number of acres needed for the project.

In the past 3 to 4 years we have been bombarded with many different solar companies, all trying to get us to sell the exact same land at a price that makes ATC's offer look like pennies. It was never about the money we turned it down because we simply do not want it there. We are unsure if ATC would use eminent domain to purchase the extra land needed to allow the solar company to gain access, it is all unknown at this point.

The last thing we would like to point out is the amount of time we have had to spend working on finding information on the project. ATC wouldn't release the maps back in the fall of 2023 when they first attempted to purchase the land, which at the time was only 10 acres, now it has grown to approximately 35. They said we had to sign papers saying it was "voluntary negotiations", our lawyers advised against signing it. Therefore we had to wait until they submitted the plans to the PSC and then had to spend multiple hours just searching through the hundreds of different files to find our area. This is all time that we could have been doing other work around our dairy operation.

David Douma
PO Box 82
Randolph, WI 53956

Organic certification		
Aerial spraying / seeding		
Manure/fertilizer application and/or storage		
Other <u>(VITA CULTURE, APiculture)</u>		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

Only access to the fields, woodlands, etc. is via one farm trail directly below ATC power lines. Also some acreage & managed woodlands, etc.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

N/A

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

N/A

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

(There is a lot with 1.367 acres but it's north of County Road E & about 1/4 mile from the proposed project. It has some buildings.)

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

Wildflowers in wetlands & in the corridor for Beekeeping.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Identical.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Depends on the scope of the proposed project. Any work done during growing season is going to have a direct impact. Only one corridor to fields.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☒ Yes ☐ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Concern over degradation of the
trail such as disturbed ground, etc,
erosion, because the terrain is hilly.

8. Complete the tables below, describing your entire farm operation. Please include all agricultural land you own or manage, including land rented from others.

Land Cover	Acres
Cropland	102
Pasture	—
Managed Woodlands	—
Idle or Fallow Farmland	—
Homes and Farm Buildings	7
Wetlands	71.2
Other (WOODLANDS)	
Total	180.2

Agricultural or Conservation Programs	Acres Enrolled
Farmland Preservation (FP) Program Zoning	0
FP Agreement Agreement # _____	0
FP Zoning & Agreement Agreement # _____	0
Conservation Reserve Enhancement Program (CREP)	0
Conservation Reserve Program (CRP)	0
Managed Forest Land (MFL)	0
Other (_____)	0

Livestock	Number
Dairy Cows	—
Replacement Dairy Cattle	—
Beef Cattle	—
Pigs	—
Sheep / Goats	—
Poultry	—
Other (_____)	—

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?
(Check all that apply)

☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☒ Homes or Farm Buildings
☐ Managed Woodlands ☐ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles		The proposed Route is directly Above our House
Erosion control		
Grassed waterways		
Fencing		
Irrigation		
Residence	X	
Farm Buildings	X	
Access	X	
Parcel severance		
Lumber		
Firewood		
Organic certification		
Aerial spraying / seeding		
Manure/fertilizer application and/or storage		
Other ():		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

It would decrease our Property Value Drastically.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

N/A

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

Our Home is recently completely renovated. Our shed behind the house is only 7 years old.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

See above, no recent upgrades to farmland.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

N/A

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

It is the same.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

I don't know depends on if the line is above or below ground.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐

Yes

☐

No

☒

Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

THIS ROUTE IN THE NEIGHBORHOOD MAKES NO
SENSE. A SMALL CHANGE WITHIN 2 MILES OF OUR HOUSE
WOULD AVOID THE NEED TO CROSS A STATE HIGHWAY
TWICE. IT WOULD IMPACT FAR FEWER PEOPLE AND SAVE
A TREMENDOUS AMOUNT OF MONEY.

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

☐ Paper Copy ☐ Email ☒ Both

Other Address Information for Agricultural Impact Statement:

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

Working around towers every year
& inconvenienced during construction.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

tiles are installed in north 40 acres
so land drains properly

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

Parcel of land we sold to Frank Behling is a dairy facility. We have many concerns of stray voltage as we have had experience with this in the past ourselves.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

n/a

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

n/a

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

n/a

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Loss due to construction takes years to get back to prior condition.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☐ No ☒ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

We are not in favor of this expansion project whatsoever.

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

FARMING AROUND HIGH LINES IS ALWAYS DIFFICULT.
ADDING MULTIPLE IRRIGATORS TO A PARCEL AND MANAGING
WATER DISTRIBUTION BECOMES EXPENSIVE AND
INEFFICIENT. PLANTING, TILLING, HARVESTING ARE ALL
MUCH LESS EFFICIENT.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

IRRIGATION SYSTEMS WILL HAVE TO BE MOVED AND
ADDITIONAL SYSTEMS PURCHASED TO COVER EXISTING
ACRES. SET-BACKS OF SYSTEMS FROM HIGH-VOLTAGE
LINES REDUCES AVAILABLE ACRES.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

THIS IS HIGHLY PRODUCTIVE LAND IN FULL, UNABATED
CIRCLES.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☐ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?

(Check all that apply)

- ☒ Cropland ☒ Pasture ☐ Idle or Fallow Farmland ☒ Homes or Farm Buildings
☐ Managed Woodlands ☐ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles	<input checked="" type="checkbox"/>	The windmills to our direct North pay 10k per year to the landowners. These towers had a 1 time easement payment that was Pennies! Time for them to be removed from my property as they limit my ownership profit potentials.
Erosion control	<input checked="" type="checkbox"/>	
Grassed waterways	<input checked="" type="checkbox"/>	
Fencing	<input checked="" type="checkbox"/>	
Irrigation	<input checked="" type="checkbox"/>	
Residence	<input checked="" type="checkbox"/>	
Farm Buildings	<input checked="" type="checkbox"/>	
Access	<input checked="" type="checkbox"/>	
Parcel severance	<input checked="" type="checkbox"/>	
Lumber	<input type="checkbox"/>	
Firewood	<input type="checkbox"/>	
Organic certification	<input type="checkbox"/>	
Aerial spraying / seeding	<input checked="" type="checkbox"/>	
Manure/fertilizer application and/or storage	<input checked="" type="checkbox"/>	
Other (future wind, solar development.	<input type="checkbox"/>	

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

They would affect every aspect of my farm operations. I can't enjoy my property because they are cut diagonal through my fields with Towers. I can't irrigate efficiently, I can't graze without breaks. Remove them

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

We have water ways that cut through my fields and limit production because flow can't be changed due to towers and paths of them

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

We are also crop and livestock producers. These powerlines release power into the surrounding areas that can be detected and bring stray voltage concerns to our livestock.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

We have fences, tree wind breaks for our crops and cattle. Irrigation, limitation solar development limitations and setbacks, wind tower setbacks, and airplane spraying limits that cost us funds every year. Crop planting limits and on and on.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

N/A

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

~~The~~ The powerline goes through our Best most productive lands. Also prevents use or limited use of irrigation due to obstacles in my Field.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

My field will suffer additional taxes and obstacles in my open fields. The soil will suffer as large equipment will occupy my properties and cause compaction issues, production issues, irrigation freezing issues and property value loss due to additional obstructions in my property.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☒ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

All Negative I have been forced to live with these power lines my entire life. They don't pay ANYTHING yet determine what I can do on my property. I get told what I can do yet get to look at them and all the side effects they bring to my property. On a wet day a person can listen to the powerline sizzle and on ANY day a person can read the power with a volt meter that is in the air without touching ANYTHING to ground it. Please just remove them as I'm not interested in the side effects of them.

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

☒ Paper Copy ☐ Email ☐ Both

Other Address Information for Agricultural Impact Statement:

Impacting property values, changing how a person can farm or use their property, and leaving side effects like stay voltage without compensation for them is ~~illegal~~ ^{illegal}?

Please return this questionnaire in the mail using the enclosed prepaid envelope by **September 26, 2024.**

Thank you.

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?
(Check all that apply)

☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☐ Homes or Farm Buildings
☐ Managed Woodlands ☐ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles		As long as there are no other poles put up - Shouldn't be a problem. It is to be just as it is. x Do need to talk to someone how it will be!
Erosion control		
Grassed waterways		
Fencing		
Irrigation		
Residence		
Farm Buildings		
Access		
Parcel severance		
Lumber		
Firewood		
Organic certification		
Aerial spraying / seeding		
Manure/fertilizer application and/or storage		
Other ():		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

not discussed with me!

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

their are grassed waterways

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

None

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

None

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

None

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

None

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Compaction / reduced yields in work

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐

Yes

☐

No

☒

Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

State Snowmobile trail
Where dirt will go
" old poles go
money compensation
natural gas line
pole locations

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

☒ Paper Copy ☐ Email ☐ Both

Poultry	
Other ()	

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?

(Check all that apply)

- ☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☐ Homes or Farm Buildings
☒ Managed Woodlands ☒ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles		
Erosion control	✓	
Grassed waterways	✓	
Fencing	✓	
Irrigation		
Residence		
Farm Buildings		
Access	✓	
Parcel severance		
Lumber		
Firewood		
Organic certification		
Aerial spraying / seeding		
Manure/fertilizer application and/or storage	✓	
Other ():		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

The access to the tower is the lane way going to my field and woods

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

There is a drain tile running under the access to the tower. My lane way may be destroyed

One tower is next to a stream in the woods not sure how that area is going to be impacted.

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

Lane way

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Unsure I was not told if they
needed to go into the field for
the project

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Unsure

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐

Yes

☐

No

☒

Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Condition of my lane way when the project is done. Its on a hill so erosion control

Compaction to Farmland if they need to drive in the field

Condition of the grassed area along my stream after the project is complete. If they put it up is it going to be weeds.

Section D: Agricultural Impact Statement

Other ():		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

Planting / harvesting / fertilizing
Access to field roads and fields

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

/

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

TWO RESIDENTIAL HOMES CURRENTLY
OCCUPIED AND MAINTAINED IN GOOD CONDITION
ONE POLE SHED STORING FARM EQUIPMENT
IN GOOD CONDITION

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

line fence along north border of the
property and a field access road

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Loss of use of 9.32 acres
represents loss of approximately 6% of
rental income (\$2,050) per year

- * 17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

SEE 16 ABOVE AND STAGING AREA
ALONG PRINDLE RD WOULD SIGNIFICANTLY IMPACT
PRIMARY FIELD ACCESS

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☐ No ☒ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

The proposed (alternate) route along the north is close to a primary residence. These lines would significantly impact the property value in a negative way. Stray voltage is also a concern for the residents.

The presence of these huge poles would significantly reduce the value of the entire property

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

N/A

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

Home is a vacation home. garage for cars, atv's, snowmobiles. Two sheds for storage.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

In the process of getting a builder to build a 40x60 shed close to existing house and garage. Need advice.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

N/A

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

N/A

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Loss of acreage and revenue

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐

Yes

☒

No

☐

Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Could transmission line be moved further south to eliminate lines so close to house and buildings.

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

☒ Paper Copy ☒ Email ☒ Both

Section B: Agricultural Operation Details

8. Complete the tables below, describing your entire farm operation. Please include all agricultural land you own or manage, including land rented from others.

Land Cover	Acres
Cropland	141
Pasture	6
Managed Woodlands	100
Idle or Fallow Farmland	
Homes and Farm Buildings	3
Wetlands	
Other (_____)	
Total	250

Agricultural or Conservation Programs	Acres Enrolled
Farmland Preservation (FP) Program Zoning	
FP Agreement Agreement # _____	
FP Zoning & Agreement Agreement # _____	
Conservation Reserve Enhancement Program (CREP)	
Conservation Reserve Program (CRP)	
Managed Forest Land (MFL)	
Other (_____)	

Livestock	Number
Dairy Cows	
Replacement Dairy Cattle	
Beef Cattle	120
Pigs	
Sheep / Goats	
Poultry	
Other (_____)	

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?

(Check all that apply)

- ☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☐ Homes or Farm Buildings
☒ Managed Woodlands ☐ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles	<input checked="" type="checkbox"/>	
Erosion control	<input checked="" type="checkbox"/>	
Grassed waterways	<input checked="" type="checkbox"/>	
Fencing	<input type="checkbox"/>	
Irrigation	<input type="checkbox"/>	
Residence	<input type="checkbox"/>	
Farm Buildings	<input type="checkbox"/>	
Access	<input checked="" type="checkbox"/>	
Parcel severance	<input type="checkbox"/>	
Lumber	<input checked="" type="checkbox"/>	
Firewood	<input checked="" type="checkbox"/>	
Organic certification	<input type="checkbox"/>	
Aerial spraying / seeding	<input type="checkbox"/>	
Manure/fertilizer application and/or storage	<input type="checkbox"/>	
Other ():	<input type="checkbox"/>	

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

I cut firewood and logs from the woods where the route is planned as a business. The route would also split my farm by going through my fields. My access to the woods is where the power line would be. It would just be an eyesore to have power lines through my cropland.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

The proposed route travels straight up a drainage ditch and crosses a grassed waterway in my fields.

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

It is good producing farmland. It is some of my higher, drier land that doesn't flood.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

When you disturb soil, it is never the same again. Crops are set back and yield less for a while. New weeds are introduced to the fields. The layout is also affected. The slope is never the same either. The soil profile can wash away or settle when it is filled back in.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☒ Yes ☐ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

Manure/fertilizer application and/or storage		
Other ():		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

Our operation wouldn't be directly affected but the ~~can~~ soil compaction / crop damage along the proposed project would be damaged.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

Soil that is compacted doesn't drain well or grow good crops

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

NONE

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

NONE

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

NONE

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Very good fertile high producing land.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Soil may be compacted severely thus not allowing good crop production for several years.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐

Yes

☐

No

☒

Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

No

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

Seneca Foods operates the center pivot irrigation to discharge waste water generated in their canning operation in Cambria. There is a pipe that carries the waste water that goes under the construction zone. Any changes to the location of the powerline towers could impact their operations and my lease.

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

The area not under the center pivot operated by Seneca Foods does have tile drains installed.

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

None

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

The irrigation system is currently designed to be in the current position of the tower on my property.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

None

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Productivity of the land is the same. However the land utilized by Seneca Forks impacts their canning operation in Cambria.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

None, beyond what is currently in place. If the current tower did not exist, we may be able to lease more land to Seneca Forks which pays above market rates.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes

☐ No

☒ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Depending on the phasing of construction and/or
the location of the towers, Genesee Foods operations
in Cambria ~~area~~ facility could be impacted.

Section D: Agricultural Impact Statement

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

loss of land, issues accessing crop fields and woodlands,
residential and farm building loss, drainage blockage,
grassland waterway blockage, river bank erosion, issues
accessing residence

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

wooded river bank along Yellow River, drain tiles and
grassed waterways along Copper Lane

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

home condition good and in use barn condition good and in use for storage, silo condition poor and not in use, two storage sheds in good condition and in use

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

The proposed acquired land is a mixture of grass land, waterway, riverway, cropland, woodland, farm building & residential home. The cropland specific to the proposed acquired land is as productive as the other cropland not proposed for acquisition.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

impacts to drainage ways and existing tiling could severely affect field drainage impacting field access, planting and crop yield it could also affect field erosion lowering soil quality, thus impacting productivity.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☐ No ☒ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Currently, the biggest concern is the potential impact to the residence and farm buildings as they lay right in the middle of the impact zone.

Section B: Agricultural Operation Details

8. Complete the tables below, describing your entire farm operation. Please include all agricultural land you own or manage, including land rented from others.

Land Cover	Acres
Cropland	All
Pasture	
Managed Woodlands	
Idle or Fallow Farmland	
Homes and Farm Buildings	
Wetlands	
Other ()	
Total	

Agricultural or Conservation Programs	Acres Enrolled
Farmland Preservation (FP) Program Zoning	All
FP Agreement Agreement # _____	
FP Zoning & Agreement Agreement # _____	
Conservation Reserve Enhancement Program (CREP)	
Conservation Reserve Program (CRP)	
Managed Forest Land (MFL)	
Other ()	

Livestock	Number
Dairy Cows	
Replacement Dairy Cattle	
Beef Cattle	
Pigs	
Sheep / Goats	
Poultry	
Other ()	

Section C: Potential Project Impacts

9. Identify the current uses of your land located within the proposed project area?
(Check all that apply)
- ☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☐ Homes or Farm Buildings
☐ Managed Woodlands ☐ Other
10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles	<input checked="" type="checkbox"/>	
Erosion control	<input checked="" type="checkbox"/>	
Grassed waterways	<input checked="" type="checkbox"/>	
Fencing	<input type="checkbox"/>	
Irrigation	<input type="checkbox"/>	
Residence	<input type="checkbox"/>	
Farm Buildings	<input type="checkbox"/>	
Access	<input type="checkbox"/>	
Parcel severance	<input type="checkbox"/>	
Lumber	<input type="checkbox"/>	
Firewood	<input type="checkbox"/>	
Organic certification	<input type="checkbox"/>	
Aerial spraying / seeding	<input checked="" type="checkbox"/>	
Manure/fertilizer application and/or storage	<input type="checkbox"/>	
Other ():	<input type="checkbox"/>	

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.
- Any time farmland is disturbed or compacted it takes up to 20 years to get back to normal
-
12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.
- all of the above
-

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

ALL

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

Some ~~of~~ of our best land

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Will have to be compensated for up to 20 years for crop loss and repair as we have had this experience before and also with a wind farm

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☒ Yes ☐ No ☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

The damage lasts for years and years
We will have to be compensated in
writing. There are no positive effects
only negative. Also over the years
they have not used the easement but come
off Cemetery Rd. They will have to pay to
come thru our property if it is used
as we receive Nothing unlike WE
Energy and the wind farm.

Section D: Agricultural Impact Statement

9. Identify the current uses of your land located within the proposed project area?

(Check all that apply)

- ☒ Cropland ☐ Pasture ☐ Idle or Fallow Farmland ☐ Homes or Farm Buildings
☐ Managed Woodlands ☐ Other

10. Please check any of the items below that you feel may be affected by the proposed project. The upcoming questions will allow you to describe the impacts.

Agricultural Issue	Check All That Apply	Comments
Drainage or Drainage Tiles		<p>We would have to shorten and remodel Irrigation system if line Right a way was approved. Would lose Irrigated Acreage.</p>
Erosion control		
Grassed waterways		
Fencing		
Irrigation	✓	
Residence		
Farm Buildings		
Access		
Parcel severance		
Lumber	✓	
Firewood	✓	
Organic certification		
Aerial spraying / seeding	✓	
Manure/fertilizer application and/or storage		
Other ():		

11. Please describe how your agricultural operation, as a whole, would be affected by the proposed project.

I would lose Irrigated Acres -
I would incur costs to remodel and move irrigation system -

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

NONE

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

NONE

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

Irrigation System would have to be
MOVED AND LOSE Irrigatable land

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

This Land is Highly Productive
Irrigated land.

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

Productivity would be Reduced on
MANY ACRES BECAUSE it is very sandy land.
AND THE Irrigation System HAVE to be Shortened which would
Reduced ACREAGE under the System

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes ☐ No ☒ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

12. Please describe the type and location of any drainage structures or erosion control features, such as drain tiles or grassed waterways that could be affected by the proposed project.

No

ditches

13. Please describe the current use and condition of any buildings, such as homes, barns, sheds, silos, or corn cribs that could be affected by the proposed project.

home and has young stock - heifers
in this area

14. Please describe the location and condition of any property improvements such as fences or irrigation systems that could be affected by the proposed project.

got a 6 wire fence along the
road and around the property

15. If organic practices are being followed on your property, please describe where and what form of organic farming might be affected by the proposed project. Also, please identify your certifier.

None

16. Describe how the land that could be acquired for this project compares in productivity to the rest of your farmland.

good crop land

17. Describe how the soil, crops and productivity of land affected by the proposed project would be impacted.

18. If managed woodlands would be acquired for this project, do you earn income or use firewood from it?

☐ Yes

☒ No

☐ Not Applicable

19. Are there any additional positive or negative effects on your farmland that you would like to bring to our attention?

Section D: Agricultural Impact Statement

20. Would you like a copy of the project Agricultural Impact Statement mailed or emailed to the addresses on the front of this Questionnaire once it is completed?

☒ Paper Copy ☐ Email ☐ Both

Other Address Information for Agricultural Impact Statement:

*Please return this questionnaire in the mail using the enclosed prepaid envelope by **September 26, 2024.***

Thank you.

APPENDIX D: WISCONSIN STATUTES

The Department of Agriculture, Trade and Consumer Protection (the Department) is required to prepare an AIS whenever more than five acres of land from at least one farm operation will be acquired for a public project if the agency/company acquiring the land has the authority to use eminent domain for property acquisitions. The Department has the option to prepare an AIS for projects affecting five or fewer acres from each farm if the proposed project would have significant effects on a farm operation. The entity proposing a construction project is required to provide the Department with the necessary details of the project so that the potential impacts and effects of the project on farm operations can be analyzed. DATCP has 60 days to make recommendations and prepare the AIS. DATCP shall publish the AIS upon receipt of the fee required to prepare the AIS. The Department provides the AIS to affected farmland owners, various state and local officials, local media and libraries, and any other individual or group who requests a copy. Thirty days after the date of publication, the project initiator may begin negotiating with the landowner(s) for the property.

I. AGRICULTURAL IMPACT STATEMENT STATUTE

[Wisconsin Statute § 32.035](#) is provided below and describes the Wisconsin Agricultural Impact Statement procedure and content.

(1) DEFINITIONS. In this section:

- (a) "Department" means department of agriculture, trade, and consumer protection.
- (b) "Farm operation" means any activity conducted solely or primarily for the production of one or more agricultural commodities resulting from an agricultural use, as defined in s. 91.01 (2), for sale and home use, and customarily producing the commodities in sufficient quantity to be capable of contributing materially to the operator's support.

(2) EXCEPTION. This section shall not apply if an environmental impact statement under s. 1.11 is prepared for the proposed project and if the department submits the information required under this section as part of such statement or if the condemnation is for an easement for the purpose of constructing or operating an electric transmission line, except a high voltage transmission line as defined in s. 196.491(1) (f).

(3) PROCEDURE. The condemnor shall notify the department of any project involving the actual or potential exercise of the powers of eminent domain affecting a farm operation. If the condemnor is the department of natural

resources, the notice required by this subsection shall be given at the time that permission of the senate and assembly committees on natural resources is sought under s. 23.09(2)(d) or 27.01(2)(a). To prepare an agricultural impact statement under this section, the department may require the condemnor to compile and submit information about an affected farm operation. The department shall charge the condemnor a fee approximating the actual costs of preparing the statement. The department may not publish the statement if the fee is not paid.

(4) IMPACT STATEMENT.

(a) *When an impact statement is required; permitted.* The department shall prepare an agricultural impact statement for each project, except a project under Ch. 82 or a project located entirely within the boundaries of a city or village, if the project involves the actual or potential exercise of the powers of eminent domain and if any interest in more than 5 acres from any farm operation may be taken. The department may prepare an agricultural impact statement on a project located entirely within the boundaries of a city or village or involving any interest in 5 or fewer acres of any farm operation if the condemnation would have a significant effect on any farm operation as a whole.

(b) *Contents.* The agricultural impact statement shall include:

1. A list of the acreage and description of all land lost to agricultural production and all other land with reduced productive capacity, whether or not the land is taken.
2. The department's analyses, conclusions, and recommendations concerning the agricultural impact of the project.

(c) *Preparation time; publication.* The department shall prepare the impact statement within 60 days of receiving the information requested from the condemnor under sub. (3). The department shall publish the statement upon receipt of the fee required under sub. (3).

(d) *Waiting period.* The condemnor may not negotiate with an owner or make a jurisdictional offer under this subchapter until 30 days after the impact statement is published.

(5) PUBLICATION. Upon completing the impact statement, the department shall distribute the impact statement to the following:

(a) The governor's office.

- (b) The senate and assembly committees on agriculture and transportation.
- (c) All local and regional units of government that have jurisdiction over the area affected by the project. The department shall request that each unit post the statement at the place normally used for public notice.
- (d) Local and regional news media in the area affected.
- (e) Public libraries in the area affected.
- (f) Any individual, group, club, or committee that has demonstrated an interest and has requested receipt of such information.
- (g) The condemnor.

II. STATUTES GOVERNING EMINENT DOMAIN

The details governing eminent domain as it relates to WisDOT projects are included in Wis. Stat. Ch. 32 (<http://docs.legis.wisconsin.gov/statutes/statutes/32.pdf>).

The Department recommends that farmland owners concerned about eminent domain powers and the acquisition of land should review this statute in its entirety. Landowners may also wish to consult with an attorney who should have expertise in eminent domain proceedings. In addition, any Wisconsin licensed appraiser that landowners employ regarding a project where eminent domain could be used should be knowledgeable in partial takings.

Section 32.09 of the Wisconsin Statutes describes the compensation provided for property acquisition and certain damages:

(6) In the case of a partial taking of property other than an easement, the compensation to be paid by the condemnor shall be the greater of either the fair market value of the property taken as of the date of evaluation or the sum determined by deducting from the fair market value of the whole property immediately before the date of evaluation, the fair market value of the remainder immediately after the date of evaluation, assuming the completion of the public improvement and giving effect, without allowance of offset for general benefits, and without restriction because of enumeration but without duplication, to the following items of loss or damage to the property where shown to exist:

- (a)** Loss of land including improvements and fixtures actually taken.
- (b)** Deprivation or restriction of existing right of access to highway from abutting land, provided that nothing herein shall operate to restrict the power of the state or any of its

subdivisions or any municipality to deprive or restrict such access without compensation under any duly authorized exercise of the police power.

(c) Loss of air rights.

(d) Loss of a legal nonconforming use.

(e) Damages resulting from actual severance of land including damages resulting from severance of improvements or fixtures and proximity damage to improvements remaining on condemnee's land. In determining severance damages under this paragraph, the condemnor may consider damages which may arise during construction of the public improvement, including damages from noise, dirt, temporary interference with vehicular or pedestrian access to the property and limitations on use of the property. The condemnor may also consider costs of extra travel made necessary by the public improvement based on the increased distance after construction of the public improvement necessary to reach any point on the property from any other point on the property.

(f) Damages to property abutting on a highway right of way due to change of grade where accompanied by a taking of land.

(g) Cost of fencing reasonably necessary to separate land taken from remainder of condemnee's land, less the amount allowed for fencing taken under par. (a), but no such damage shall be allowed where the public improvement includes fencing of right of way without cost to abutting lands.

Section 32.19 of the Wisconsin Statutes outlines payments to be made to displaced tenant occupied businesses and farm operations.

(4m) BUSINESS OR FARM REPLACEMENT PAYMENT. (a) Owner-occupied business or farm operation. In addition to amounts otherwise authorized by this subchapter, the condemnor shall make a payment, not to exceed \$50,000, to any owner displaced person who has owned and occupied the business operation, or owned the farm operation, for not less than one year prior to the initiation of negotiations for the acquisition of the real property on which the business or farm operation lies, and who actually purchases a comparable replacement business or farm operation for the acquired property within two years after the date the person vacates the acquired property or receives payment from the condemnor, whichever is later. An owner displaced person who has owned and occupied the business operation, or owned the farm operation, for not less than one year prior to the initiation of negotiations for the acquisition of the real property on which the business or farm operation lies may elect to receive the payment under par. (b) 1. in lieu of the payment under this paragraph, but the amount of payment under par. (b) 1. to such an owner displaced person may not exceed the amount the owner displaced person is eligible to

receive under this paragraph. The additional payment under this paragraph shall include the following amounts:

1. The amount, if any, which when added to the acquisition cost of the property, other than any dwelling on the property, equals the reasonable cost of a comparable replacement business or farm operation for the acquired property, as determined by the condemnor.
2. The amount, if any, which will compensate such owner displaced person for any increased interest and other debt service costs which such person is required to pay for financing the acquisitions of any replacement property, if the property acquired was encumbered by a bona fide mortgage or land contract which was a valid lien on the property for at least one year prior to the initiation of negotiations for its acquisition. The amount under this subdivision shall be determined according to rules promulgated by the department of administration.
3. Reasonable expenses incurred by the displaced person for evidence of title, recording fees and other closing costs incident to the purchase of the replacement property, but not including prepaid expenses.

(b) Tenant-occupied business or farm operation. In addition to amounts otherwise authorized by this subchapter, the condemnor shall make a payment to any tenant displaced person who has owned and occupied the business operation, or owned the farm operation, for not less than one year prior to initiation of negotiations for the acquisition of the real property on which the business or operation lies or, if displacement is not a direct result of acquisition, such other event as determined by the department of commerce, and who actually rents or purchases a comparable replacement business or farm operation within 2 years after the date the person vacates the property. At the option of the tenant displaced person, such payment shall be either:

1. The amount, not to exceed \$30,000, which is necessary to lease or rent a comparable replacement business or farm operation for a period of 4 years. The payment shall be computed by determining the average monthly rent paid for the property from which the person was displaced for the 12 months prior to the initiation of negotiations or, if displacement is not a direct result of acquisition, such other event as determined by the department of administration and the monthly rent of a comparable replacement business or farm operation and multiply the difference by 48; or
2. If the tenant displaced person elects to purchase a comparable replacement business or farm operation, the amount determined under subd. 1 plus expenses under par. (a) 3.

(5) EMINENT DOMAIN. Nothing in this section or ss. 32.25 to 32.27 shall be construed as creating in any condemnation proceedings brought under the power of eminent domain, any element of damages.

Section 32.25 of the Wisconsin Statutes delineates steps to be followed when displacing persons, businesses, and farm operations.

(1) Except as provided under sub.(3) and s. 85.09 (4m), no condemnor may proceed with any activity that may involve the displacement of persons, business concerns or farm operations until the condemnor has filed in writing a relocation payment plan and relocation assistance service plan and has had both plans approved in writing by the department of administration.

(2) The relocation assistance service plan shall contain evidence that the condemnor has taken reasonable and appropriate steps to:

(a) Determine the cost of any relocation payments and services or the methods that are going to be used to determine such costs.

(b) Assist owners of displaced business concerns and farm operations in obtaining and becoming established in suitable business locations or replacement farms.

(c) Assist displaced owners or renters in the location of comparable dwellings.

(d) Supply information concerning programs of federal, state and local governments which offer assistance to displaced persons and business concerns.

(e) Assist in minimizing hardships to displaced persons in adjusting to relocation.

(f) Secure, to the greatest extent practicable, the coordination of relocation activities with other project activities and other planned or proposed governmental actions in the community or nearby areas which may affect the implementation of the relocation program.

(g) Determine the approximate number of persons, farms or businesses that will be displaced and the availability of decent, safe and sanitary replacement housing.

(h) Assure that, within a reasonable time prior to displacement, there will be available, to the extent that may reasonably be accomplished, housing meeting the standards established by the department of administration for decent, safe and sanitary dwellings. The housing, so far as practicable, shall be in areas not generally less desirable in regard to public utilities, public and commercial facilities and at rents or prices within the financial means of the families and individuals displaced and equal in number to the number of such displaced families or individuals and reasonably accessible to their places of employment.

(i) Assure that a person shall not be required to move from a dwelling unless the person has had a reasonable opportunity to relocate to a comparable dwelling.

(3) (a) Subsection (1) does not apply to any of the following activities engaged in by a condemnor:

1. Obtaining an appraisal of property.
2. Obtaining an option to purchase property, regardless of whether the option specifies the purchase price, if the property is not part of a program or project receiving federal financial assistance.

III. STATUTES GOVERNING ACCESS

Section 86.05 of the Wisconsin Statutes states that access shall be provided to land which abuts a highway:

Entrances to highway restored. Whenever it is necessary, in making any highway improvement to cut or fill or otherwise grade the highway in front of any entrance to abutting premises, a suitable entrance to the premises shall be constructed as a part of the improvements, and if the premises are divided by the highway, then one such entrance shall be constructed on each side of the highway. Thereafter, each entrance shall be maintained by the owner of the premises. During the time the highway is under construction, the state, county, city, village or town shall not be responsible for any damage that may be sustained through the absence of an entrance to any such premises.

Section 84.25 of the Wisconsin Statutes describes access restrictions concerning a controlled-access highway.

(3) CONSTRUCTION; OTHER POWERS OF DEPARTMENT. In order to provide for the public safety, convenience and the general welfare, the department may use an existing highway or provide new and additional facilities for a controlled-access highway and so design the same and its appurtenances, and so regulate, restrict or prohibit access to or departure from it as the department deems necessary or desirable. The department may eliminate intersections at grade of controlled-access highways with existing highways or streets, by grade separation or service road, or by closing off such roads and streets at the right-of-way boundary line of such controlled-access highway and may divide and separate any controlled-access highway into separate roadways or lanes by raised curbing, dividing sections or other physical separations or by signs, markers, stripes or other suitable devices, and may execute any construction necessary in the development of a controlled-access highway including service roads or separation of grade structures.

(4) CONNECTIONS BY OTHER HIGHWAYS. After the establishment of any controlled-access highway, no street or highway or private driveway, shall be opened into or connected with any

controlled-access highway without the previous consent and approval of the department in writing, which shall be given only if the public interest shall be served thereby and shall specify the terms and conditions on which such consent and approval is given.

(5) USE OF HIGHWAY. No person shall have any right of entrance upon or departure from or travel across any controlled-access highway, or to or from abutting lands except at places designated and provided for such purposes, and on such terms and conditions as may be specified from time to time by the department.

(6) ABUTTING OWNERS. After the designation of a controlled-access highway, the owners or occupants of abutting lands shall have no right or easement of access, by reason of the fact that their property abuts on the controlled-access highway or for other reason, except only the controlled right of access and of light, air or view.

(7) SPECIAL CROSSING PERMITS. Whenever property held under one ownership is severed by a controlled-access highway, the department may permit a crossing at a designated location, to be used solely for travel between the severed parcels, and such use shall cease if such parcels pass into separate ownership.

IV. STATUTES GOVERNING DRAINAGE

Section 88.87(2) of the Wisconsin Statutes describes regulations concerning rights of drainage:

(a) Whenever any county, town, city, village, railroad company or the department of transportation has heretofore constructed and now maintains or hereafter constructs and maintains any highway or railroad grade in or across any marsh, lowland, natural depression, natural watercourse, natural or man-made channel or drainage course, it shall not impede the general flow of surface water or stream water in any unreasonable manner so as to cause either an unnecessary accumulation of waters flooding or water-soaking uplands or an unreasonable accumulation and discharge of surface water flooding or water-soaking lowlands. All such highways and railroad grades shall be constructed with adequate ditches, culverts, and other facilities as may be feasible, consonant with sound engineering practices, to the end of maintaining as far as practicable the original flow lines of drainage. This paragraph does not apply to highways or railroad grades used to hold and retain water for cranberry or conservation management purposes.

(b) Drainage rights and easements may be purchased or condemned by the public authority or railroad company having control of the highway or railroad grade to aid in the prevention of damage to property owners which might otherwise occur as a result of failure to comply with par. (a).

(c) If a city, village, town, county, or railroad company or the department of transportation constructs and maintains a highway or railroad grade not in accordance with par. (a), any property owner damaged by the highway or railroad grade may, within 3 years after the alleged damage occurred, file a claim with the appropriate governmental agency or railroad company. The claim shall consist of a sworn statement of the alleged faulty construction and a description, sufficient to determine the location of the lands, of the lands alleged to have been damaged by flooding or water-soaking. Within 90 days after the filing of that claim, the governmental agency or railroad company shall either correct the cause of the water damage, acquire rights to use the land for drainage or overflow purposes, or deny the claim. If the agency or company denies the claim or fails to take any action within 90 days after the filing of the claim, the property owner may bring an action in inverse condemnation under ch. 32 or sue for such other relief, other than damages, as may be just and equitable.

WisDOT [specification 205.3.3](#) further describes its policies concerning drainage:

- (1)** During construction, maintain roadway, ditches, and channels in a well-drained condition at all times by keeping the excavation areas and embankments sloped to the approximate section of the ultimate earth grade. Perform blading or leveling operations when placing embankments and during the process of excavation except if the excavation is in ledge rock or areas where leveling is not practical or necessary. If it is necessary in the prosecution of the work to interrupt existing surface drainage, sewers, or under drainage, provide temporary drainage until completing permanent drainage work.
- (2)** If storing salvaged topsoil on the right-of-way during construction operations, stockpile it to preclude interference with or obstruction of surface drainage.
- (3)** Seal subgrade surfaces as specified for subgrade intermediate consolidation and trimming in 207.3.9.
- (4)** Preserve, protect, and maintain all existing tile drains, sewers, and other subsurface drains, or parts thereof that the engineer judges should continue in service without change. Repair, at no expense to the department, all damage to these facilities resulting from negligence or carelessness of the contractor's operations.

V. LANDOWNER BILL OF RIGHTS

[Wisconsin Statute § 182.017](#) **Transmission lines; privileges; damages** is provided below:

(1g) Definitions. In this section:

(a) "Commission" means the public service commission.

(b) "Project Initiators" means any of the following:

1. A corporation, limited liability company, partnership, or other business entity organized to furnish telegraph or telecommunications service or transmit heat, power, or electric current to the public or for public purposes.
2. An independent system operator, as defined in s. 196.485 (1) (d).
3. An independent transmission owner, as defined in s. 196.485 (1) (dm).
4. A cooperative association organized under ch. 185 or 193 to furnish telegraph or telecommunications service.
5. A cooperative association organized under ch. 185 to transmit heat, power, or electric current to its members.
6. An interim cable operator, as defined in s. 66.0420 (2) (n).
7. A video service provider, as defined in s. 66.0420 (2) (zg).

(bm) "Municipal regulation" means any contract, ordinance, resolution, order, or other regulation entered into, enacted, or issued by a municipality before, on, or after July 2, 2013.

(c) "Municipality" means a city, village, or town.

(cq) "Telecommunications service" means the offering for sale of the conveyance of voice, data, or other information, including the sale of service for collection, storage, forwarding, switching, and delivery incidental to such communication regardless of the technology or mode used to make such offering.

(ct) "Urban rail transit system" means a system, either publicly or privately owned, which provides transportation by rail in a municipality to the public on a regular and continuing basis and which begins service on or after July 2, 2013.

(d) "Video service network" has the meaning given in s. 66.0420 (2) (zb).

(1r) Right-of-way for. Any company may, subject to ss. 30.44 (3m), 30.45, 86.16, and 196.491 (3) (d) 3m. and to reasonable regulations made by any municipality through which its transmission lines or systems may pass, construct and maintain such lines or

systems with all necessary appurtenances in, across or beneath any public highway or bridge or any stream or body of water, or upon any lands of any owner consenting thereto, and for such purpose may acquire lands or the necessary easements; and may connect and operate its lines or system with other lines or systems devoted to like business, within or without this state, and charge reasonable rates for the transmission and delivery of messages or the furnishing of heat, power, or electric light.

(2) Not to obstruct public use. But no such line or system or any appurtenance thereto shall at any time obstruct or incommode the public use of any highway, bridge, stream or body of water.

(3) Abandoned lines removed. The commission after a public hearing as provided in s. 196.26, and subject to the right of review as provided in ch. 227, may declare any line to have been abandoned or discontinued, if the facts warrant such finding. Whenever such a finding shall have been made the company shall remove such line, and on failure for 3 months after such finding of abandonment or discontinuance, any person owning land over, through or upon which such line shall pass, may remove the same, or the supervisors of any town within which said lines may be situated, may remove the said lines from the limits of its highways, and such person or supervisors shall be entitled to recover from the company owning the lines the expense for labor involved in removing the property.

(4) Location of poles. In case of dispute as to the location of poles, pipes or conduits, the commissioners appointed in condemnation proceedings under ch. 32 may determine the location. In no case, except where the owner consents, shall poles be set in front of or upon any residence property, or in front of a building occupied for business purposes, unless the commissioners find that the same is necessary and the court may review the finding.

(5) Tree trimming. Any company which shall in any manner destroy, trim or injure any shade or ornamental trees along any such lines or systems, or, in the course of tree trimming or removal, cause any damage to buildings, fences, crops, livestock or other property, except by the consent of the owner, or after the right so to do has been acquired, shall be liable to the person aggrieved in 3 times the actual damage sustained, besides costs.

(6) Municipal franchise required. No lighting or heating corporation or lighting or heating cooperative association shall have any right hereunder in any municipality until it has obtained a franchise or written consent for the erection or installation of its lines from such municipality.

(7) High-voltage transmission lines. Any easement for rights-of-way for high-voltage transmission lines as defined under s. 196.491 (1) (f) shall be subject to all of the following conditions and limitations:

- (a) The conveyance under ch. 706 and, if applicable, the petition under s. 32.06 (7), shall describe the interest transferred by specifying, in addition to the length and width of the right-of-way, the number, type and maximum height of all structures to be erected thereon, the minimum height of the transmission lines above the landscape, and the number and maximum voltage of the lines to be constructed and operated thereon.
- (b) In determining just compensation for the interest under s. 32.09, damages shall include losses caused by placement of the line and associated facilities near fences or natural barriers such that lands not taken are rendered less readily accessible to vehicles, agricultural implements and aircraft used in crop work, as well as damages resulting from ozone effects and other physical phenomena associated with such lines, including but not limited to interference with telephone, television and radio communication.
- (c) In constructing and maintaining high-voltage transmission lines on the property covered by the easement the utility shall:
 - 1. If excavation is necessary, ensure that the top soil is stripped, piled and replaced upon completion of the operation.
 - 2. Restore to its original condition any slope, terrace, or waterway which is disturbed by the construction or maintenance.
 - 3. Insofar as is practicable and when the landowner requests, schedule any construction work in an area used for agricultural production at times when the ground is frozen in order to prevent or reduce soil compaction.
 - 4. Clear all debris and remove all stones and rocks resulting from construction activity upon completion of construction.
 - 5. Satisfactorily repair to its original condition any fence damaged as a result of construction or maintenance operations. If cutting a fence is necessary, a temporary gate shall be installed. Any such gate shall be left in place at the landowner's request.
 - 6. Repair any drainage tile line within the easement damaged by such construction or maintenance.
 - 7. Pay for any crop damage caused by such construction or maintenance.

8. Supply and install any necessary grounding of a landowner's fences, machinery or buildings.
- (d) The utility shall control weeds and brush around the transmission line facilities. No herbicidal chemicals may be used for weed and brush control without the express written consent of the landowner. If weed and brush control is undertaken by the landowner under an agreement with the utility, the landowner shall receive from the utility a reasonable amount for such services.
- (e) The landowner shall be afforded a reasonable time prior to commencement of construction to harvest any trees located within the easement boundaries, and if the landowner fails to do so, the landowner shall nevertheless retain title to all trees cut by the utility.
- (f) The landowner shall not be responsible for any injury to persons or property caused by the design, construction or upkeep of the high-voltage transmission lines or towers.
- (g) The utility shall employ all reasonable measures to ensure that the landowner's television and radio reception is not adversely affected by the high-voltage transmission lines.
- (h) The utility may not use any lands beyond the boundaries of the easement for any purpose, including ingress to and egress from the right-of-way, without the written consent of the landowner.
- (i) The rights conferred under pars. (c) to (h) may be specifically waived by the landowner in an easement conveyance which contains such paragraphs verbatim.
- (8) Commission review.**
- (a) Upon complaint by a company that a regulation by a municipality under sub. (1r) is unreasonable, the commission shall set a hearing and, if the commission finds that the regulation is unreasonable, the regulation shall be void. Subject to pars. (am) to (c), if the commission determines that a municipal regulation that was in effect on January 1, 2007, and immediately prior to January 9, 2008, or that a community standard, as demonstrated through consistent practice and custom in the municipality, that was in effect on January 1, 2007, and immediately prior to January 9, 2008, is substantially the same as the municipal regulation complained of, there is a rebuttable presumption that the latter regulation is reasonable.
- (am) A municipal regulation is unreasonable if it has the effect of creating a moratorium on the placement of company lines or systems under sub. (1r) or on

the entrance into the municipality of a video service provider, as defined in s. 66.0420 (2) (zg), or is inconsistent with the purposes of s. 66.0420.

(as) Notwithstanding sub. (2), a municipal regulation is unreasonable if it requires a company to pay any part of the cost to modify or relocate the company's facilities to accommodate an urban rail transit system.

(b) A municipal regulation is unreasonable if it requires a company to pay more than the actual cost of functions undertaken by the municipality to manage company access to and use of municipal rights-of-way. These management functions include all of the following:

1. Registering companies, including the gathering and recording of information necessary to conduct business with a company.
2. Except as provided in provided in par. (c), issuing, processing, and verifying excavation or other company permit applications, including supplemental applications.
3. Inspecting company job sites and restoration projects.
4. Maintaining, supporting, protecting, or moving company equipment during work in municipal rights-of-way.
5. Undertaking restoration work inadequately performed by a company after providing notice and the opportunity to correct the work.
6. Revoking company permits.
7. Maintenance of databases.
8. Scheduling and coordinating highway, street, and right-of-way work relevant to a company permit.

(c) A municipal regulation is unreasonable if it requires a company to be responsible for fees under s. 182.0175 (1m) (bm) that may be assessed to a municipality as a member of the one-call system under s. 182.0175.

(d) It is reasonable for a municipal regulation to provide for the recovery of costs incurred under par. (b) 1., 2., 3., and 7. through a preexcavation permit fee.

(e) It is reasonable for a municipal regulation to provide for the recovery of costs incurred under par. (b) 4., 5., and 6. only from the company that is responsible for causing the municipality to incur the costs.

(9) Time limit for permits. If a municipality establishes a permit process under sub. (1r), the municipality shall approve or deny a permit application no later than 60 days after receipt of the application, and, if the municipality fails to do so, the municipality shall be considered to have approved the application and granted the permit. If a municipality denies a permit application, the municipality shall provide the applicant a written explanation of the reasons for the denial at the time that the municipality denies the application.

Agricultural Monitoring Form for Transmission Line Projects

s. 32.035, Wis. Stats.

Please complete this form at the end of the week for the duration of the transmission line construction project, summarizing the daily construction activities and inspection observations on agricultural land for that week. This form should be submitted to DATCP electronically at DATCPAgricultureStatements@wisconsin.gov, unless another electronic project document storage location is specified.

Personal information you provide may be used for purposes other than that for which it was originally collected (s. 15.04 (i)(m), Wis. Stats.)

Section 1: Project/Site Information.

INSPECTION DATES:	DATCP PROJECT # AND NAME:
MONITOR NAME:	MONITOR PHONE # AND EMAIL:
LOCATION OF WORK CONDUCTED THIS WEEK (AGRICULTURAL PARCEL NUMBERS OR STRUCTURE NUMBERS):	
WEEKLY WEATHER/ SITE CONDITIONS:	

Section 2: Summary of Daily Construction Activities for the Week.

--

Section 3: Landowner Communication - Complete for each landowner correspondence that week. Add additional rows as necessary.	
NAME OF LANDOWNER:	DESCRIBE COMMUNICATION:
LOCATION (PARCEL NO. OR STRUCTURE NO.):	
DATE:	

Section 4: Weekly Inspection Summary - Indicate the status of each inspection item on agricultural land, summarized for the week. If an item was observed as not acceptable but was corrected later in that week, make note in the comments section that the item was already corrected.					
Items Inspected On Agricultural Land	Acceptable	Not Acceptable	Follow Up Required	N/A	Comments
Clearing Practices	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Dewatering Facilities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Erosion Control Practices	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Soil Segregation and Storage of Topsoil Spoils	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Soil Mixing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Soil Compaction	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Excess Rock Content in Soil	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Rutting	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Crop Damage	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Damage to Drainage Improvements (tile, ditches, etc.)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Unnatural Field Flooding or Ponding of Water	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Biosecurity Concern	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Organic Farms	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Damage to Conservation Techniques (grassed waterways, terraces, contour strips, etc.)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Other:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Other:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Section 5: Outstanding Ag Impact Items to Date – Complete for all locations requiring follow-up actions as identified in Section 4. Previously identified issues should remain in this table on each weekly report until they are corrected. Add additional rows as necessary.				
ISSUE LOCATION	ISSUE	DATE OBSERVED	ACTION/RESOLUTION NEEDED	DATE CORRECTED

Section 6: Photos of Construction Observations - Include at least one photo for each item inspected in Section 4. The photo(s) of each inspection item should be representative of the daily observations that week. Add rows as needed.
