GUIDANCE DOCUMENT

# CY2020 Webinar Series: Pet Food Tonnage, Sampling, and Inspections

*This guidance document is based on Wis. Stat. ch. 94.72 and chapter(s) ATCP 42 Wis. Admin. Code. This document is intended solely as guidance, and does not contain any mandatory requirements except where requirements found in statute or administrative rule are referenced. This guidance does not establish or affect legal rights or obligations, and is not finally determinative of any of the issues addressed.*

The feed program is planning a webinar series for the spring of CY2020 related to the different types of feed manufacturers in the state of Wisconsin, according to the inspection type. This is one of three unique webinars that will be presented as an outreach effort. The pet food manufacturer webinar is tentatively planned to be a 90 minute presentation held in the late morning of February 11, 2020. Topics covered include pet food tonnage, pet food surveillance sampling, and “what to expect from an inspection.”

**A previous feed specialist conducted regional meetings similar to these webinars in format, and the meetings were well-received by industry. In order to limit travel expenses for DATCP staff and the attendees, webinars seemed one of the most suitable ways to bring the outreach idea back into the feed program.**
