For Bee Shipments to Wisconsin this Year

Dear Beekeeper:

Please fill out the enclosed **WISCONSIN HONEY BEE IMPORT REPORT** (printed on reverse side) if you are planning to ship bees to Wisconsin this year. *This includes bees being brought in for pollination services.* Ask your [local apiary service](#) to forward a valid inspection certificate, or you may submit a photocopy of the valid certificate with this report. The inspection certificate and Honey Bee Import Report must be sent to the Wisconsin Apiary Program *before* your first shipment of bees arrives in the state. A valid inspection certificate is based on an inspection performed within the last 12 months.

If these bees were inspected in Wisconsin last fall, please note that on your Wisconsin Honey Bee Import Report in the paragraph below your contact information and a Wisconsin Certificate will be sufficient. If the bees you intend to import were *not* inspected in WI last fall, you will need to follow the requirements in the paragraph above.

In an effort to better notify and respond to local pest or pathogen outbreaks we are asking beekeepers to identify each apiary site by posting the beekeeper's name and phone number in a location that is prominently displayed, weather-resistant and visible upon approach to the apiary's main entrance.

This form can be submitted online at: <https://tinyurl.com/WI-HBIR>. A PDF is also available on our website. Feel free to contact me with any questions or comments,
