

State of Wisconsin
Governor Scott Walker

Department of Agriculture, Trade and Consumer Protection
Sheila E. Harsdorf, Secretary

TO: Liquefied Petroleum Gas Meter Operators
FROM: Bureau of Weights and Measures, Division of Trade and Consumer Protection
SUBJECT: Liquefied Petroleum Gas (LPG) Weights and Measures License Application

You need a current annual license for each commercial LPG you operate. The license fee is \$60. The meter license expires on November 30th and a separate license is required for each meter. LPG meters are defined as commercial meters used to measure liquefied petroleum gas sold to a consumer. Licenses cannot be prorated or transferred between operators or meters.

ANNUAL LICENSING

1. For new meters, an initial test report verifying the meter is accurate must be submitted to the department with the license applications before a license can be issued for a new meter.
2. Complete and return the signed license application with a check payable to DATCP to the address on the application. Be sure to include all of the requested information on the form. Licenses will not be issued if applications are incomplete. Please take time to ensure the following information is correct:
 - ✓ Legal business name registered with the Wisconsin Department of Financial Institutions.
 - ✓ Address where the meter (truck) is physically kept. If the meter is not easily located using the address, write specific directions including fire number or the nearest crossroad.
3. Return the application with license fee to the mailing address on page one of the application form.

METER TEST REQUIREMENTS

1. Operators need to have a Wisconsin licensed Weights and Measures Service Company test meters at least annually (within 12 months of the previous test). For example, if you had your meter tested in June last year, you need to have it tested by the last day of June this year.
2. Wisconsin licensed Weights and Measures Service Companies are listed on the following website:
<https://datcp.wi.gov/Documents/WeightsMeasuresServiceCompanyListing.pdf>
3. You, or the service company on your behalf, need to send **all** meter test reports to the department within 30 days of the actual test date. If, for instance, you have a meter repaired and you test a meter multiple times in a year, all test reports must be sent to the department within 30 days of each test. We use the postmark or e-mail date to determine the 30 days.

An equal opportunity employer

4. If a test finds a meter inaccurate, the meter may not be used until a licensed service company corrects the problem, retests the meter, and delivers a written report to the meter owner/operator verifying the meter is accurate.
5. All LPG meters are subject to inspection by State Weights and Measures officials. All mobile LPG meters (trucks) shall be available for testing at the location you state on the license applications. If your business has mobile meters (trucks) headquartered at more than one (1) location, and you are unable to bring all the mobile meters to one location then you are required to license each meter at its physical location.

TEST SURCHARGES

- **Overdue annual test surcharge:** An operator who fails to conduct an annual test on a meter within 12 months of the previous test must pay a \$200 surcharge.
- **Late test report surcharge:** An operator must send all Wisconsin licensed Weights and Measures service company meter test reports to the department within 30 days of the test date. Operators that send a test report more than 30 days after the test is completed must pay a \$200 surcharge for late test reporting.
- The department will not issue or renew your license if the surcharge is not paid.
- Additional civil forfeiture penalties may also apply.

* Devices installed after January 1, 2003 must be marked with a Certificate of Conformance Number (CC). You can also locate CC numbers by using the certificate of conformance search on the NCWM website at <http://ncwm.net/certificates> or contact a service company representative or the manufacturer of the meter if you need assistance filling out the CC numbers.

ANNUAL PRIVATE TESTING REQUIREMENT FOR LPG

A person licensed to operate an LPG meter shall have the meter tested for accuracy, at least annually, by a person who is licensed under s. 98.18(1) to perform the test. The meter operator, or the tester on behalf of the meter operator, shall report the results of each test to the department within 30 days after the testing is completed. The operator shall retain a record of each test for at least 3 years. (Section 98.224(3), Wis. Stats.)

Attach a copy of the test report dated within the last 12 months from a Wisconsin licensed service company verifying the meter was accurate. A license will not be issued if the application is not completely filled out, signed, payment enclosed, and test report(s) attached.

Test report attached to the application.
