

Basic & Advanced Soil Health Training Fall 2016

Attention: Agronomists, Certified Crop Advisors, Agency Staff, Farmers in and around targeted watersheds

UW-Extension, NRCS, and the DNR have partnered together to provide basic and advanced soil health training for agronomists, CCAs, agency staff and farmers. Participants will receive hands-on soil health training and a *kit of soil health tools* to use in the field! The program launches this September with an online training and two field days:

- September 29, 2016: Dunn County

- October 26, 2016: Dell Creek Watershed in Sauk/Juneau county

More details about this course can be found at:

<http://conservation-training.uwex.edu/initiative/watersheds-and-soil-health>
OR
<http://go.wisc.edu/ty817o>

CCA CEU credits available!

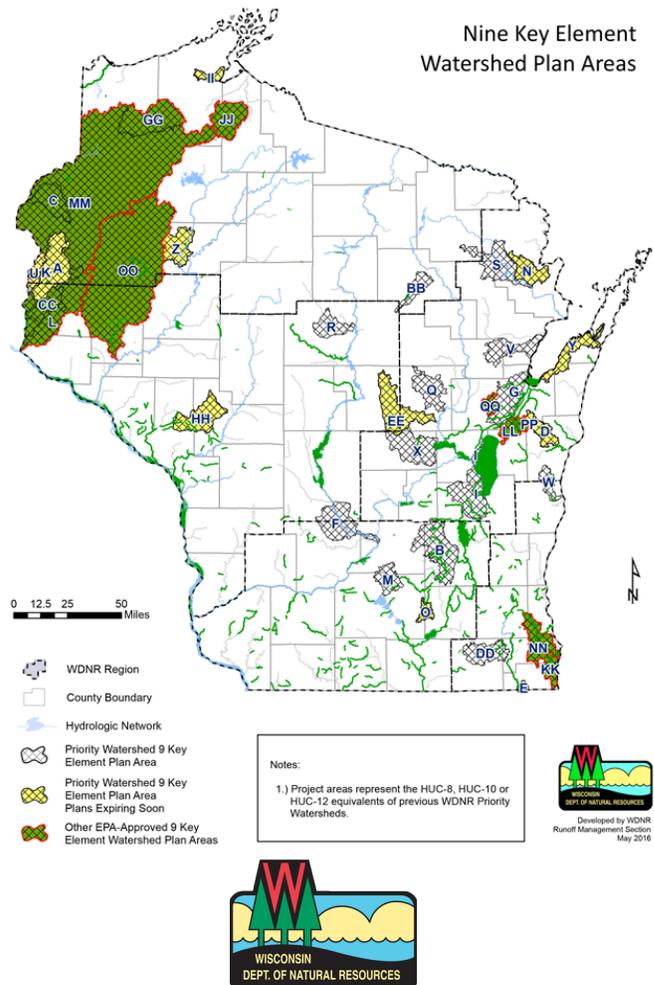

Key Aspects of Training:

*Participants are encouraged to use the kit on five different fields in nine months. Those who complete the training and use the kit five times in target watersheds will receive:

- \$75 credit for the advanced course (summer 2017) or \$50 of the \$150 free rebated back to you.

- Upon request, an additional discount will be available for other online CPTP Soil Health Courses such as:

- Soil Moisture
- Cover Crops
- Soil Health Management Systems
