*Values for first year available nutrients in lbs/ton or lbs/1000 gallons

#### Field Restrictions

- **Graze**
  - Season: Fall
  - Spread Method: Sp...
  - Acres: 7
  - Rate: 10
  - Units: Tons
  - NOx Inh: Checked

#### Nutrient Application Planner

- *Crop Year: 2018*
- *Field Over(+)/Under(-) Application (lbs/acre):*
  - N: 84
  - P2O5: 99
  - K2O: 122

---

**Notes:**
- Overapplication of manure N of 69 lbs N/acre.
- One or more applications are not compatible with 'none' or 'no till' selected on the cropping screen.

**Please explain non-compliant applications:**

[Apply] [Calculate Erosion]
THAT’S THE HAPPY PATH
BUT WHAT IF...

1. My farm isn’t a CAFO?
2. I don’t have the correct sources listed in my spreadsheet?
3. I realize I need to edit the data after I import?
4. I want to do fertilizer, or lime, or grazing?
5. I want to work by # of loads instead of rate?
OH. RIGHT. LOADS.

• Given either loads or rate, SnapPlus can calculate the other.

• Given entered numbers in both, it’s going to get confused. Don’t do that.

• Imported spreadsheets have to be one or the other.
HERE’S A PLACE TO START
BUT WAIT, THERE’S STILL MORE!
