Wisconsin Nursery License
Growing, Buying, and Selling Plants
The History of Nursery Licensing
In 1899, the Wisconsin state legislature created the office of State Orchard and Nursery Inspector. This position was created to monitor for San Jose scale, a major orchard and nursery pest introduced from China to California in 1870.

As early as 1911, the legislature required that all nursery growers and dealers obtain certification to sell nursery stock. All plants had to be inspected and found free of injurious pests and diseases. The certification charge to growers was $5 for less than one acre, $10 for more than one acre, and $5 for dealers. That would be nearly $100 and $200 in current dollars!

Why does Wisconsin license?
The Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP), is entrusted by the legislature to license nursery growers, dealers and Christmas tree growers under state law (Wis. Stat. § 94.10 and Wis. Admin. Code § ATCP 21). DATCP licenses primarily to manage and monitor pests and diseases, and to ensure that healthy nursery stock is being sold. Having a listing of all growers and dealers and their sources allows for efficient tracking and interception of harmful pests or diseases.

Who needs a Nursery license?
Anyone selling more than $250 annually in nursery stock or Christmas trees needs to be licensed. Nursery stock is defined by state law (Wis. Stat. § 94.10) as plants and plant parts that can be reproduced and grown, excluding seeds, sod, cranberry cuttings, annuals, and evergreen trees grown for eventual harvest and sale as Christmas trees. Christmas trees growers are licensed separately under this statute.

What are the benefits of being licensed?
It is a goal of the Nursery Program to be grower-friendly. In addition to surveying for regulated pests, we hope to be a resource for any pest or disease issues you may encounter. After your nursery is licensed, you will receive regular inspections of your nursery stock. This inspection will take place every one to three years. During the inspection, the inspector will look for regulated pests and diseases and provide a report of general pests and diseases found during the inspection. Inspectors can provide additional information on management of pests and cultural problems, when requested.

For growers who send stock out of Wisconsin or out of a quarantine, we can assist with complying with the regulatory requirements of the receiving state/country. Call us before planning to ship (a year before, if possible) to ensure that all the regulatory issues are attended to.

What does the license fee pay for?
Your annual license fee pays for inspectors and management of the nursery program. These fees, when collected, go into a special fund set aside for these purposes.

How do I get licensed?
Apply online at https://mydatcp.wi.gov
For a paper application, email datcpnursery@wisconsin.gov or call (608) 224-4574.
Types of Nursery Licenses

Nursery Dealer
A nursery dealer is a person who buys nursery stock from a wholesaler or distributor and re-sells the nursery stock. The nursery stock is usually sold that year and is not split, propagated, planted in the ground, or changed from the way it was purchased. A nursery dealer could include garden centers, landscape contractors, perennial installers, tree “spaders,” or brokers. Nursery stock sales could include bulbs, trees, fruit trees, rhizomes, shrubs, perennial herbs, perennials, aquatic plants, and native grasses. Only one dealer license is needed to cover all nursery stock sales locations. You do not need a nursery license to grow or sell any amount of annuals, fruits, vegetables, most herbs, or cut flowers.

Nursery Grower
A nursery grower is a person who grows, plants, splits or propagates nursery stock (herbaceous and/or woody perennial stock) which is capable of over-wintering in Wisconsin. This stock can be from seeds, seedlings, or adult plant material. The nursery stock is usually held at the grower’s location for at least a year. A nursery grower is usually someone who has growing fields, but it can also include applicants who grow plants in greenhouses or in containers. You do not need a nursery license to grow or sell any amount of annuals, fruits, vegetables, most herbs, or cut flowers.

Christmas Tree Grower
A Christmas tree grower is a person who grows and maintains evergreen trees for eventual sale as Christmas trees.

How much does a license cost?
License fees are based on gross annual sales for nursery growers and Christmas tree growers. Nursery dealer license fees are based on gross annual purchases of perennial/nursery stock. If your sales do not exceed $250 per year, a license is not required. You can apply for one of these licenses or any combination of them. Some people find they need all three.

- If gross annual sales of Nursery Stock do not exceed $250, No License is issued.
- If gross annual nursery sales do not exceed $250, No License is issued.
- If gross annual Christmas tree sales do not exceed $250, No License is issued.
Certification of Plant Material
Nurseries wanting to send stock out-of-state or out of the country may need to send certification that the stock is free of certain pests or diseases (plant health certificates or phytosanitary certificates). You can get information about these certificates by calling DATCP at (608) 224-4596 or email datcpphyto@wisconsin.gov

You can also review the plant laws and regulations for each state at www.nationalplantboard.org.

Other Licenses or Certification a Nursery May Need
Seed labeler: Any person or business who labels agricultural, turf, vegetable, or native seed offered for sale. For more information call DATCP at (608) 224-4596.

Pesticide dealer: If you sell restricted use pesticides. For more information call DATCP at (608) 224-4548.

Pesticide applicator: If you apply or your operators apply restricted use pesticides. For more information call DATCP at (608) 224-4548.
