

What is a Secure Food Supply Plan?

- Provides a workable business continuity plan for operations that are under movement restrictions but ***not infected*** with a Foreign Animal Disease (FAD).
- Offers movement guidance for producers, haulers, packing/processing plants, and officials managing the outbreak.
- Provides biosecurity and surveillance guidance for producers.

Why Should I Create a Secure Food Supply Plan?

- Limit lost income in the event of an FAD outbreak.
- Helps to minimize interruptions in your ability to move animals and animal products if your farm shows no evidence of infection.
- Keep your animals healthy and protect your farm's reputation by taking steps to reduce the risk of an FAD crossing onto your farm premises.
- Support your market by maintaining the supply of products to customers and enhancing consumer confidence in the safety of your products.

How Can I Participate in the Secure Food Supply program?

- Visit the DATCP Secure Food Supply website to learn more.
- Register your premises with the Wisconsin Livestock Identification Consortium. (https://wiid.org/)
- Visit the Secure Food Supply Plans website (https://www.cfsph.iastate.edu/secure-food-supply/) for more information and templates to get you started.
- Work with your veterinarian or contact Wisconsin DATCP for assistance developing your site-specific plan.
