Control of Blossom Blight and Fruit Brown Rot in Cherries, Peaches and Nectarines

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Indar[®] 2F fungicide before applying. Carefully follow all precautionary statements and applicable use directions.
- In addition to restrictions and limitations imposed by this supplemental labeling, use of Indar 2F according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Indar 2F.

Directions for Use

Refer to product label for Mixing, Handling and Application instructions.

Indar 2F is a protectant fungicide. Best disease control is achieved when a protectant application schedule is followed.

Use 6 to 12 fl oz of Indar 2F (0.094 to 0.188 lb active) per acre in a minimum of 20 gallons of water by ground or 10 gallons of water by air. Indar 2F may be applied up to the day of harvest.

To control blossom blight in cherries, peaches and nectarines, begin applications at early red bud stage before infection occurs. If conditions are favorable for disease development, apply again at full bloom and at petal fall.

To control fruit brown rot in cherries, peaches and nectarines, begin applications 2 to 3 weeks before harvest using a 7- to 10-day spray interval.

Specific Use Restrictions:

- Do not make more than 8 applications at the 6 fl oz rate or 4 applications at the 12 fl oz rate.
- Do not apply more than 48 fl oz of Indar 2F (0.75 lb active) per acre per season.
- Do not graze livestock in treated areas or feed cover crops grown in treated areas to livestock.
- **Chemigation:** Do not apply this product through any type of irrigation system.

It is a violation of federal law to harm an endangered species. Use of this product may be in counties which have endangered and threatened species present; therefore, applicators should evaluate the areas to be treated and take necessary precautions to avoid harming endangered species or their

habitat/environment. Applicators may refer to http://datcp.wi.gov/Farms/Endangered_Species/ for help in identifying the species and their habitats. Growers who are uncertain of the presence of a protected species should contact the Wisconsin Department of Agriculture, Trade and Consumer Protection at 608-224-4547.
