Temperature Guide

- Cook foods to the proper temperature.
- Re-heat food rapidly (within 2 hours or less).
- Never re-heat in a steam table or in a food warmer (crock pot or Nesco for example). Use the stovetop or microwave.
- Cool hot foods from 135°F to 70°F within 2 hours and within a total of 6 hours from 135°F to 41°F or less.
- Pre-chill ingredients when making a cold salad to help prevent long time periods in the danger zone.

165°F for 15 seconds—Cooking poultry, stuffed meats, stuffing with meat; wild game, raw animal foods in a microwave and those that have been par-cooked; and Reheating of left-over foods or foods in a microwave oven for hot hold.
