

Which Japanese Beetle Compliance Agreement (JBCA) Do You Need?

1. Ships bare root stock only – no JB compliance agreement needed!
2. Ships plants with soil or soilless mix west of Minnesota – compliance agreement needed.

a. The states shipped to will determine which category of agreement you will need (*you may need multiple agreements*):

- i. Category 1
- ii. Category 2

b. If shipping to CA--they have a *state specific* additional compliance agreement and certification options.

3. Certification options vary depending on the type of stock.

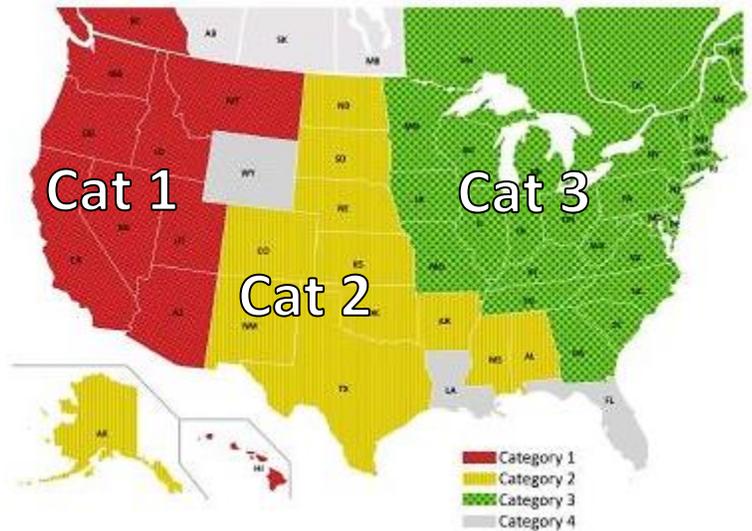

a. For Category 1 States:

- i. Production in an Approved Japanese Beetle Free Greenhouse/Screenhouse
- ii. Production During a Pest Free Window (October 1 – May 31)
- iii. Application of Approved Regulatory Treatments
 1. Dip Treatment – B&B and Container Plants (rootball diameter 12 inches or smaller)
 2. Drench Treatments – Container Plants Only (rootball diameter 12 inches or smaller)
 3. Media (Granule) Incorporation – Container Plants Only (rootball diameter 12 inches or smaller)
 4. ~~Methyl Bromide Fumigation~~ (*Being phased out in WI*)
- iv. ~~Detection Survey for Origin Certification~~ (*Not an option for WI*)

b. For Category 2 States:

- i. Application of Approved Regulatory Treatments
 1. Dip Treatments – B&B and Container Plants (rootball diameter of 32 inches or smaller)
 2. Pre-Harvest Soil Surface Treatments – B&B or field-potted plants
- ii. Japanese Beetle Nursery Trapping Program (*Only available in a few select WI counties*)
- iii. Field Grown Nursery Stock Accreditation Program – B&B or field-potted plants
- iv. Containerized Nursery Stock Accreditation Program – Containerized potted plants
- v. Shipment of Sod

4. During the adult Japanese beetle flight period (June 1 – September 30) Adult Japanese Beetle Mitigation Requirements must be followed for any stock destined for Category 1/2 States—*See requirements for Japanese beetle Adult Mitigation Criteria in the Harmonization Plan.*
