## Nutrient Management Farmer Education for **PASTURES AND GRAZING**

This online training on the basic concepts of soil fertility management in Wisconsin will cover the material required to write your own grazing and pastures nutrient management plan for participation in conservation programs. The 2.5 hour class will be taught via presentations shared over Zoom and include an introduction to the grazing tools in the SnapPlus program.

Both dates present identical material, so you only need to attend one.

January 5 (Thursday) OR  February 14 (Tuesday)

Please register online at least three days in advance  
of the training date you plan to attend:

<https://go.wisc.edu/775z71>

### AGENDA (9:30 AM-12 NOON)

1. Benefits and value of nutrient management planning for grazing systems
2. Soil sampling procedures and guidelines
3. Managing soil fertility in grazing systems
4. Introduction to SnapPlus nutrient management planning software
5. Funding and grant opportunities for nutrient management planning
6. Questions and wrap-up
