Lafayette	Platteville E			7	9	2	2	0	2
Rock	Clinton SW			2	0	2	0	0	

Pheromone traps were established at 14 sites throughout southwest Wisconsin in 2023 to monitor captures of true armyworm moths after localized infestations of first-generation larvae developed during the week of June 8-14. The results are summarized in the table above. Trap type: green universal bucket trap. Lure type: Trécé Pherocon True Armyworm. Note: Count listed for Belmont E July 7-13 is for a two-week monitoring period. Data may be requested in MS excel format by contacting tracy.schilder@wisconsin.gov.
