

# Adams County Land & Water Management Plan 2026-2035

Our Mission is centered around empowering our local community by recognizing the vital role of local knowledge, engagement, and decision-making in shaping and implementing effective conservation practices.

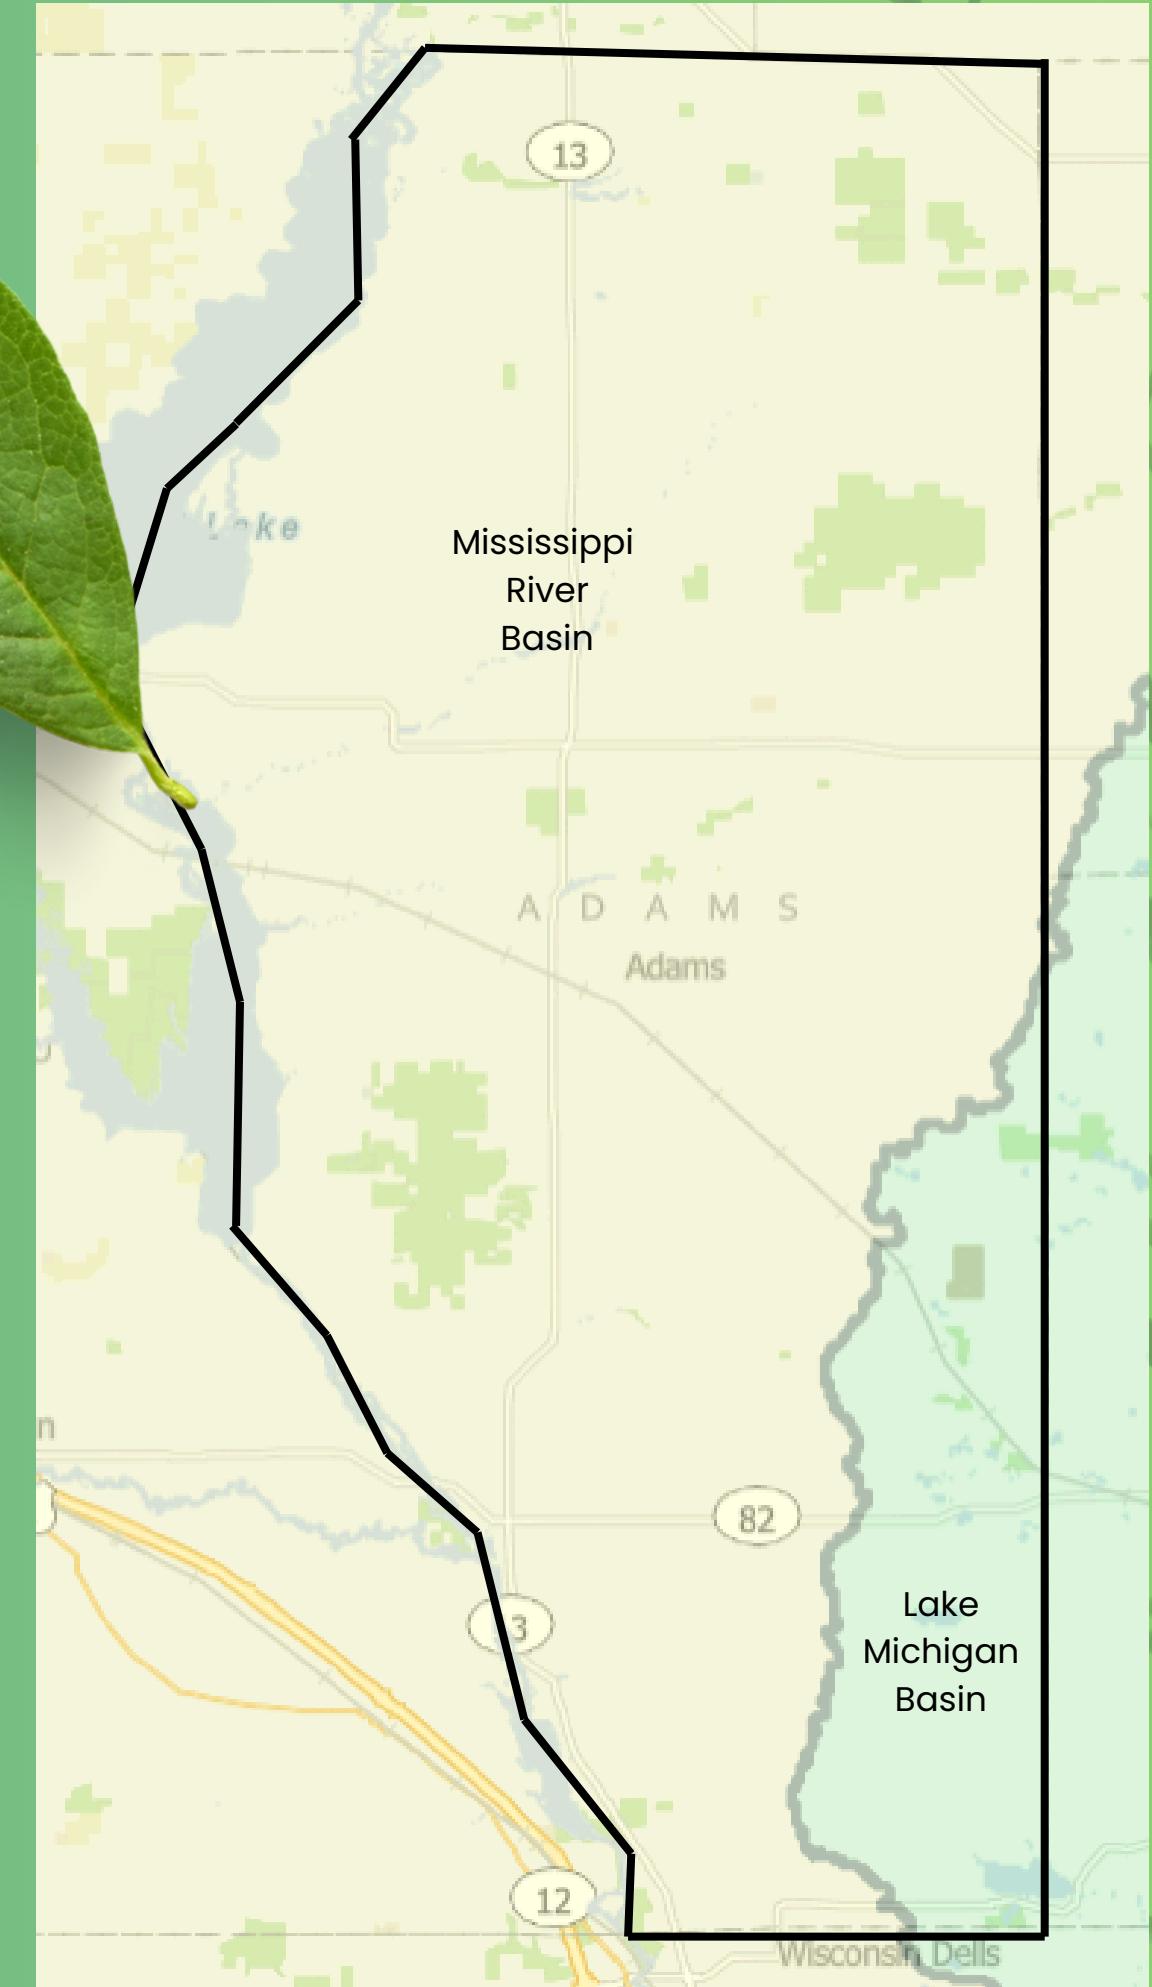

# Adams County, Wisconsin

# Resource Concerns

- 0 Soil Erosion
- 0 Wetland Conservancy
- 0 Woodland Fragmentation
- 0 Groundwater Quality/Quantity
- 0 Wildlife Habitat/Prairie Restoration
- 0 Shoreland Impacts/Health
- 0 Non-Point Source

# 2026-2035 Workplan Goals:

**GOAL 1:**

Create a Culture where landowners take ownership of their impact on the environment.

**GOAL 2:**

Protect and improve groundwater quality and quantify as well as surface water quality

**GOAL 3:**

Reduce Wind Erosion

**GOAL 4:**

Engage and Support our local youth in conservation efforts

**GOAL 5:**

No Net Loss of Existing Wetlands

**GOAL 6:**

Promote Working Forests

# 2026-2031 Workplan Priorities

Utilize models to gain knowledge and install conservation practices to reduce sedimentation into waterbodies.

Develop tracking methods to document soil loss reductions

Protect Natural Wetlands

Implement 9KEP and support local watershed groups

Attend, Present, and encourage local 4H chapters

Maintain economically viable forest

# Challenges

Nutrient Management Planning/Farmland  
Preservation

Invasive Species Control

Water Quality/Erosion Control

# Accomplishments

**SWRM COST-SHARE**

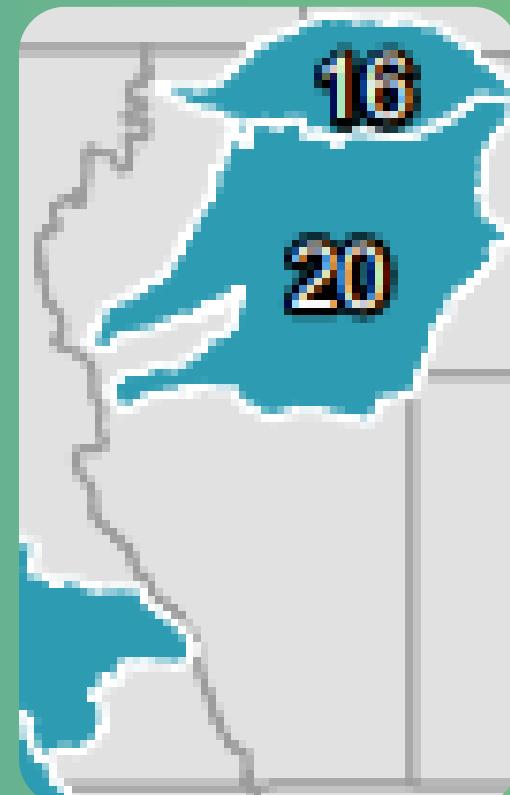

**BEFORE**

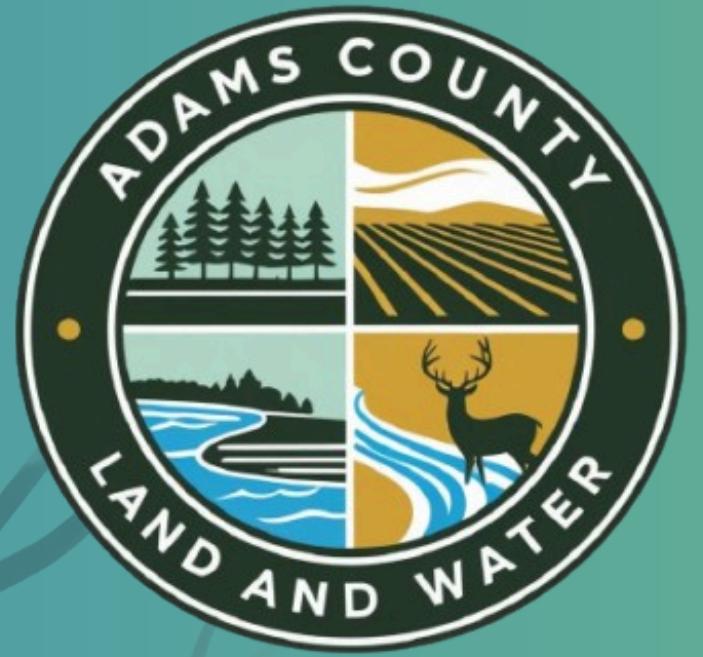

**AFTER**

**PLWG**

**20 of 22 Lakes**
