

Current Wisconsin Pesticides with an Endangered Species Protection Bulletin

Current as of: 12/31/2025

This list was created to increase awareness and outreach on complying with applicable pesticide use limitation areas and bulletins found on EPA's [Bulletins Live! Two](#) website.

Bulletins may change over time. This list is a snapshot in time and is only current as of the date noted above. Current and previous lists are superseded whenever any changes are made to the [Bulletins Live! Two](#) website by EPA.

This list only shows products that are currently registered for use in Wisconsin with the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) and have an active bulletin in the State of Wisconsin. Unregistered products with bulletins are not included in this list.

Active Ingredient	Restriction
Methoxyfenozide	Prohibition against use in certain areas
Cyantraniliprole	Restrictions on aerial applications
Isocycloseram	Restriction on applications to cucurbits

To find out the exact restriction and where these restrictions apply go to:

<https://www.epa.gov/endangered-species/bulletins-live-two-view-bulletins>.

Applicators are responsible for obtaining and complying with any applicable bulletins.

It is a violation of Federal law to use a pesticide in a manner inconsistent with its labeling, including labeling instructions to follow all directions and restrictions contained in any applicable Bulletin(s).
