

## Grant opportunities for producer led groups

Currently, there are many opportunities of potential funding sources for groups that are working towards nonpoint source pollution abatement, particularly through agricultural conservation efforts.

One idea for potential funding is to check out your local cooperatives' and local businesses' giving programs---they may have funds available to perform outreach and conservation efforts. These opportunities can typically be found on their websites. In addition to local sponsorships, check out these other local, statewide and national organizations, which may have grant funds available for your project.

Please note that many of these entities require your organization to be a **501 (c) not-for-profit** organization to receive funding.

For more details on each grant program, please click on the website link listed below.
